

Hidden Voices

Can you write your own song lyrics?

1. Pick a favourite song and listen to the chorus. This is the part of the song that comes back several times with the same words or tune.

2. Think about something important to you right now: this could be friends, family, work or something happening in the world that has got your attention. Can you write a few lines, sentences or words that sum up how you feel about that important thing? Or a really short story about that subject?

3. Now going back to the song you picked, imagine there are no words in the chorus. Can you make the words you've written fit the tune? You may need to take some words out of sentences or make some words really long to fit over several notes.

Have fun!
